ABSTRACT

Earlier Journals were published in print format but now due to the development of digital media several journals are published exclusively in digital form /electronic format. Thus, the e- journals to become very popular and integrated information system, which are being indexed by major services and also cited by researchers. In this paper efforts are being made to understand the current place of the e-journals within the information system and used in academic work.

KEYWORDS: e- journal, Indexing, digital resources, information communication, Internet, World Wide Web, Search engines.
